

CORSAVY TOKEN WHITE PAPER

Introduction

Corsavy Token (CST) is the cryptocurrency that back the investment site www.corsavy.net.

Corsavy.net is an investment company based in the United Kingdom, registered as Corsa Holdings Limited with the company registration number 13833269.

Corsavy.net was a company under R.Robinson & Co.(Motor Services) Limited since 2002. The company became an independent company in 2022.

It is a vibrant and promising company in the cryptocurrency and forex market.

We have and continue to develop some of the best trading bots to help us take advantage of the market circles.

We also take advantage of the experiences of many of our team members who are early adopters of bitcoin to select new start-up projects with the potential to yield good returns and invest in such projects.

Corsavy.net was here before cryptocurrencies were invented and we were one of the early adopters of Bitcoin and other cryptocurrencies.

We have been in the market for long and we have gain all the experiences in the cryptocurrency market from the very beginning.

Background

Today, almost all the new crypto start-ups use the concept of PROOF of STAKE instead of the old mining concept, PROOF OF WORK, which is energy consuming.

With the vast capital available on our side coming from investors like from all over the world, we take advantage of this and stake a lot of these coins to increase our returns on deposits received.

Corsavy.net has the most advanced and the most accurate Algorithmic trading robots in the world. Trading with us is safe and accurate. The safety of your fund is guaranteed with us.

The company's goal is to build its own decentralized exchange and an escrow systems that will address some of the challenges in the crypto and forex trading ecosystem.

However, organization process of such a technically complex business requires constant funding source.

We hope to find such financial source by attracting investment. To this end, the company will launch a major financial project, which will be available to all cryptocurrency users by the second quarter of 2023. More details will be released via our news portal.

The Corsavy Token is the Token to back our decentralized exchange and an escrow systems that will address some of the challenges in the crypto and forex trading ecosystem.

Abstract

Crypto and Forex trading is very profitable yet there are many scams in the industry.

Most of the scams are centralized based platforms.

Corsavy Token aims to develop a decentralized exchange and an escrow systems that will address some of the challenges in the crypto and forex trading ecosystem.

SOLUTIONS CORSAVY WILL PROVIDE

Some problems we want to solve with the car protocol token.

1. Scam prevalence in the Forex and crypto trading sector.

We aim to develop a decentralized Forex and crypto trading platform that is not regulated by anyone.

No account suspension nor KYC needed on such platforms.

2. Decentralized e-currency exchange linked to the Forex and crypto platform.

We want to develop a decentralized e-currency exchange where e-currencies like Perfectmoney, Payeer Advcash etc can be converted to cryptocurrencies and other ecurrencies instantly with extremely low fees.

3. Development of a decentralized algorithmic trading robot.

Corsavy already have an advanced algorithmic trading robot that we use to trade since 2017.

Our aim is to bring this robot to a decentralized platform with full tutorials on how to use it and make profit trading crypto and forex.

4. Decetralized escrow

A decentralized escrow will be part of the solution undet the Corsavy Token platform.
